

Faculty Review of Open eTextbooks

The [California Open Educational Resources Council](http://www.cool4ed.org) has designed and implemented a faculty review process of the free and open etextbooks showcased within the California Open Online Library for Education (www.cool4ed.org). Faculty from the California Community Colleges, the California State University, and the University of California were invited to review the selected free and open etextbooks using a rubric. Faculty received a stipend for their efforts and funding was provided by the State of California, the William and Flora Hewlett Foundation, and the Bill and Melinda Gates Foundation.

- This "book" is truly boundless. In fact, it suffers from too much information to the point that it becomes difficult to keep track of the subject matter. While it does cover pretty much everything necessary for a General Chemistry class, it would be difficult to use this book in class.
- I like the links to instructional videos (although many of these were non-functional).
